APRIL 28, 2009 AMENDMENT TO ITEM NO. 24: KATIE A. STRATEGIC PLAN, TRI-ANNUAL REPORT ON THE MENTAL HEALTH SCREENING PROCESS

On April 28, 2009, the Board ordered the Chief Executive Officer (CEO), the Department of Children and Family Services (DCFS) and the Department of Mental Health (DMH) to prepare a monthly report on the mental health screening process. On January 19, 2010, the Board ordered the CEO, DCFS and DMH to report on how to reduce the time between mental health screenings and the start of mental health services. In response, DCFS and DMH reviewed a sample of children's cases and on March 16, 2010, provided the Board with a plan that resulted in a redesign of the Coordinated Services Action Team (CSAT) and Referral Tracking System (RTS). On April 17, 2012, the Board Deputies approved the current format of the report and agreed that the report, dated April 30, 2012, would be the last monthly report and, going forward, the report would be submitted every four months starting on August 31, 2012. Subsequent reports would be submitted on December 31, April 30 and August 31 for each respective year.

This is the seventh tri-annual report updating your Board on the redesign of the CSAT implemented on October 1, 2010 and providing progress of all Service Planning Areas (SPAs) for the Fiscal Year (FY) 2013–2014, (July 1, 2013 through June 30, 2014), as of August 8, 2014.

CSAT Process

The CSAT process requires expedited screening and response times based upon the acuity of a child's need for mental health services. Additionally, the CSAT process provides for the annual screening of children in existing cases with previous negative screens. Four tracks establish the process by which all DCFS children in new and currently open cases are screened and referred for mental health services.

Track	Screening Process
Track 1	Children in newly opened cases who are detained and placed in out-of-home care receive a mental health screening at case opening.
Track 2	Children in newly opened cases under Voluntary Family Maintenance, Voluntary Family Reunification or Court-supervised Family Maintenance case plans are screened at case opening.
Track 3	Children in existing cases, opened before CSAT implementation, are screened at the next case plan update.
Annual	Children in existing cases are screened 12 months after previously screening negative.

Referral Tracking System (RTS)

The RTS Summary Data Report (Attachment 1) includes 22 data elements providing the rate, number, timeliness, and acuity of mental health screenings, referral, and service response times to DCFS children in new and existing cases on a point-in-time basis.

The RTS Summary Data Report as of August 8, 2014 provides the progress of all SPAs for the FY 2013–2014, from July 1, 2013 through June 30, 2014. This report reflects CSAT performance completed through August 8, 2014 and is a snapshot of work in progress. The following two charts depict the results to date for all three tracks associated with the screening and referral process activity from July 1, 2013 through June 30, 2014.

Chart I shows that of 22,844 children, 22,312 children required screens. (22,844 minus those currently receiving mental health services [36¹], in closed cases [439], who ran away or were abducted [57]):

Of the 22,312 children who required screens:

- 18,801 (84.26%) children screened positive of all children requiring screens (22,312);
- 2,784 (12.48%) children screened negative of all children requiring screens (22,312);
- 727 (3.26%) children have screens pending of all children requiring screens (22,312).

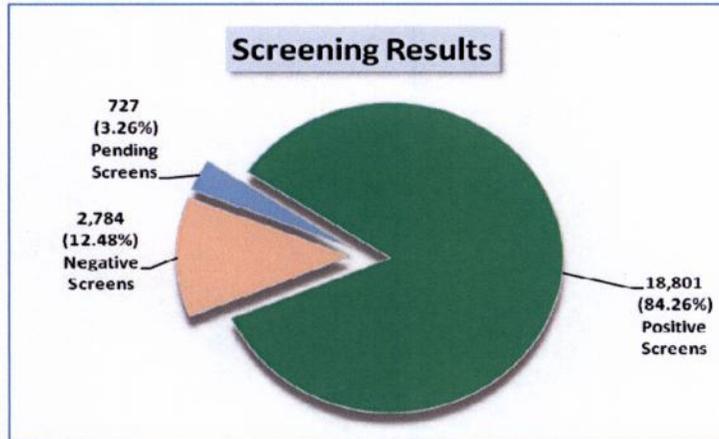

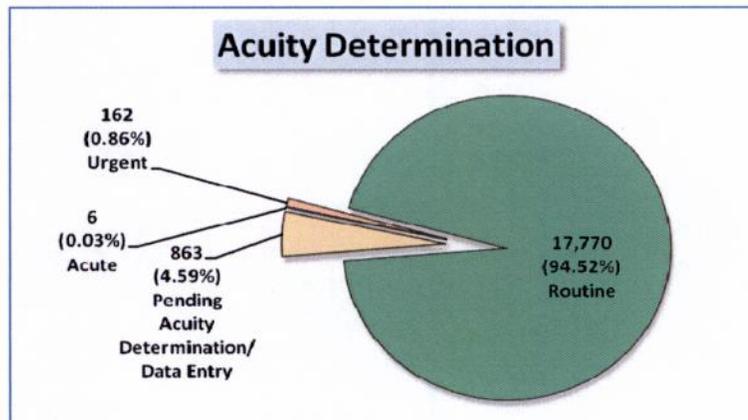

Chart II shows that of the 18,801 children who screened positive:

- 6 (0.03%) children were determined to have acute needs;
- 162 (0.86%) children were determined to have urgent needs;
- 17,770 (94.52%) children were determined to have routine needs;
- 863 (4.59%) children's acuity level was pending determination and/or data entry.

¹ The total number of children in all tracks currently receiving mental health services is 312. However, only children in existing cases (track 3 [36]) are subtracted from the total number of children requiring screens because all children in new cases (track 1 [40] and track 2 [236]) must be screened whether or not they are already receiving mental health services.

Acuity Referral Standards

Acute	Children presenting with acute needs are referred for mental health services on the same day as screening.
Urgent	Children presenting with urgent needs are referred for mental health services within one day of screening.
Routine	Children presenting with routine needs are referred for mental health services within 10 days of screening.

The average number of days between screening and referral to DMH for mental health services according to acuity for FY 2013-2014 as of August 8, 2014:

- Children with acute needs were referred to DMH on same day on average.
- Children with urgent needs were referred to DMH in 1 day on average.
- Children with routine needs were referred to DMH in 5 days on average.

Mental Health Service Activity Standards

Acute	Children presenting with acute needs begin receiving mental health service activities on the same day as the referral.
Urgent	Children presenting with urgent needs begin receiving mental health service activities within no more than three days of the referral.
Routine	Children presenting with routine needs begin receiving mental health service activities within no more than thirty days of the referral.

The average number of days between referral to and receipt of a mental health activity according to acuity in FY 2013-2014 as of August 8, 2014:

- Children with acute needs received a mental health service activity within the same day of the referral, on average. (Attachment 2, line 19a);
- Children with urgent needs received a mental health service activity within 1 day of the referral, on average (Attachment 2, line 19b); and
- children with routine needs received a mental health service activity within 2 days of the referral, on average (Attachment 2, line 19c).

The rate of children that received a mental health activity with required timeframes according to acuity FY 2013-2014 as of August 8, 2014:

- 100 percent of children with acute needs received DMH services on the same day as the referral (Attachment 2, line 20a);
- 96.30 percent of children with urgent needs received DMH services within 3 days of the referral (Attachment 2, line 20b); and
- 96.93 percent of children with routine needs received DMH services within 30 days of the referral (Attachment 2, line 20c).

CSAT MH Screening Achievements

As of August 8, 2014 for children served in the FY 2013-2014, the average timeline from case opening/case plan update to the start of mental health service activities is 14 days.

- DCFS and DMH continue to collaborate in order to sustain improvements made in mental health screening, assessment and service delivery:
 - 96.74 percent of children who were eligible for screening were screened for mental health needs;
 - 95.91 percent of children who screened positive were referred to mental health services; and
 - 96.32 percent of children referred for services received mental health service activities within the required timelines.
- During this review period MAT Assessors in 6 of 8 SPAs have received Strengths and Needs trainings in-order to improve the development of a common language around the underlying needs and strengths of children and families that are served by our community providers. . The two remaining SPAs will be trained by October 2014.

Quality Service Review

The Quality Service Review (QSR) process is the central strategy adopted by Los Angeles County, in collaboration with the Katie A. Advisory Panel and plaintiff attorneys, to assess the quality of the services delivered to members of the Katie A. class. The QSR is an action-oriented learning process used to improve practice and service delivery for children and families. The QSR is also a measure of how well DCFS and DMH are implementing the Core Practice Model, the primary framework for practice expectations. Findings from case reviews are used to guide next steps to support practice and enhancing efforts that will lead to better outcomes for the families served.

The QSR measures both systems performance and outcomes for children and families. It reflects the quality of services in such areas as family engagement, teaming among service providers, and children and families, as well as the ability to assess the needs that bring families to DCFS' attention, and provide timely and adequate services and supports. The QSR evaluates outcomes such as safety, permanency, well-being, school performance, and the ability to form appropriate social relationships.

Fifteen DCFS offices have completed a second QSR (thirteen of which have finalized scores).* The following provides a sample of historical and the most recent QSR data results, narrative findings, and a QSR story. The focus is on those indicators that are most essential to improving the work. As a point of reference, the higher the scores achieved, the better the practice and outcomes. Benchmarks targeted for systems performance and child status are noted in the table below. Definitions of these indicators are found at the end of the following section.

QSR Results:

Service Area	Regional office	Date of QSR	Overall Child/ Youth Status*	Overall Practice Performance*	Engagement**	Teamwork**	Assessment**	Long-term View	Supports and Services	Adequacy of Intervention
7	Belvedere	Baseline 7/1/2010	84%	31%	46%	16%	45%	23%	62%	38%

*A score of 85 is our target score (8 out of 13 offices met target scores on Overall Child/Youth Status)

**A score of 75 is our target score (10 out of 13 offices met target scores on Engagement)

Definition of Indicators:

INDICATOR	DEFINITION
Overall Child/Youth Status	The QSR Protocol provides ten qualitative indicators for measuring the status of a focus child.
Overall Practice Performance	This measure is based on nine qualitative indicators measuring certain core practice functions being provided with and for the focus child and the child's parents and/or caregivers.
Engagement	Degree to which those working with the focus child and family are: Relating with the child/youth, biological family, extended family, primary caregiver, and other team members for the purpose of building a genuine, trusting and collaborative working relationship. Identifying a support system and/or finding family members who can assist with support and permanency for the focus child. Developing and maintaining a mutually beneficial trust-base working relationship with the child and family that involve having unconditional positive regard, respect for diversity, an inclusive planning process, and the ability to understand and work through resistance to participating in services. Focusing on the child and family's strengths and needs. Being receptive, dynamic, and willing to make adjustments in scheduling and meeting locations to accommodate family participation. Offering transportation and child care supports, where necessary, to increase family participation in planning and support efforts.
Teaming	Degree to which: (1) the "right people" for this child and family have formed a working Child and Family Team that meets, talks, and plans together. (2) The CFT has the skills, family knowledge, and abilities necessary to define the strengths and needs of this child and family and to organize effective service for this child and family, given the level of complexity of circumstances and cultural background of the child and family. (3) Members of the child and family's team collectively function as a unified team in planning services and evaluating results. (4) The decisions and actions of the team reflect a coherent pattern of effective teamwork and collaborative problem solving that builds upon child and family strengths and needs to benefit the child and family.
Long-term View	Degree to which: There are stated, shared, and understood safety, well-being, and permanency outcomes and functional life goals for the child and family that specify required protective capacities, desired behavior changes, sustainable supports, and other accomplishments necessary for the child and family to achieve and sustain adequate daily functioning and greater self-sufficiency.
Assessment	Degree to which those involved with the child and family understand: (1) Their strengths, needs, preferences, and underlying issues. (2) What must change for the child to function effectively in daily settings and activities and for the family to support and protect the child effectively. (3) What must change for the child/family to have better overall well-being and improved family functioning. (4) The "big picture" situation and dynamic factors impacting the child and family sufficiently to guide intervention. (5) The outcomes desired by the child and family from their involvement with the system. (6) The path and pace by which permanency will be achieved for a child who is not living with nor returning to the family of origin.
Intervention Services and Supports	Degree to which the strategies, supports, and services planned for the child, parent or caregiver, and family are available on a timely and adequate basis to meet near-term child and family needs and to achieve the outcomes planned.
Adequacy of Services and Supports	Degree to which planned interventions, services, and supports being provided to the child and family have <i>sufficient power</i> (precision, intensity, duration, fidelity, and consistency) and <i>beneficial effect</i> to produce results necessary to meet near-term needs and achieve outcomes that fulfill the long-term view.

Most Recent Office QSR Results:

The most recent QSR (with finalized scores available) was conducted during May 2014 within the Santa Clarita/West San Fernando Valley (WSFV) DCFS Regional Office, Service Area 2. The key results are provided below:

Service Area	Regional office	Date of Last QSR	Overall Child/ Youth Status*	Overall Practice Performance*	Engagement**	Teaming**	Assessment**	Long-term View	Intervention Services and Supports	Adequacy of Services and Supports
2	Santa Clarita/WSFV	Baseline	92%	58%	75%	25%	75%	58%	75%	50%
2	Santa Clarita/WSFV	2 nd Round May 2014	78%	44%	44%	11%	33%	56%	89%	56%

In May 2014, nine (9) randomly selected Santa Clarita/WSFV office cases were reviewed. With respect to overall child/youth status, a 14 percent decline was measured when compared to their previous baseline score. The case reviews scored 44 percent in the acceptable range with respect to overall practice performance. This score was 3 percentage points lower than the countywide baseline and 14 percentage points lower than the Santa Clarita/WSFV office's relatively high score during the first cycle.

Scores on nearly half of the practice indicators were higher in Santa Clarita/WSFV during the second cycle compared to the countywide baseline scores. With respect to Countywide baseline comparisons on "Long-Term View," 56% percent of Santa Clarita/WSFV cases scored favorably (compared to 39 percent in the countywide baseline); on "Supports & Services", 89% scored favorably (compared to 66% in the baseline); on "Intervention Adequacy", 56 percent scored in the favorable range (compared to 52 percent in the countywide baseline).

In addition, the Santa Clarita/WSFV Office improved their practice scores within their office during the second cycle when compared to their baseline cycle scores on the indicators of "Supports & Services" by 14%, and "Intervention Adequacy", by 6%. There were declines in the practice indicators of Engagement, Teamwork and Assessment & Understanding.

The last three offices reviewed in the second cycle -- Metro North, Pasadena, and Santa Clarita/WSFV -- saw a decline in overall practice scores; this followed what had been a positive trend seen in nine of the first ten offices, where overall practice improved by 36% in Belvedere, 23% in Santa Fe Springs, 27% in Compton, 24% in Vermont Corridor, 44% in Wateridge, 31% in Pomona, 10% in Glendora, and 6% in San Fernando Valley when compared against their own baseline scores.

The overall practice score for the countywide baseline cycle was 47% acceptable; in the thirteen offices scored during the second round, the cumulative overall practice score improved by 7% to 54% acceptable.

The two practice indicators that have improved the most during the second cycle continue to be "Engagement" and "Long-Term View". This reflects that staff within the

system of care are developing positive rapport and effective working relationships with children/youth and families and their informal supports to bring them in as full participants in case planning and goal accomplishment. It also means that staff within the system of care are creating better "shared and understood" safety, well-being, and permanency outcomes and functional life goals for the child and family that specify required protective capacities, desired behavioral changes, sustainable supports, and other accomplishments necessary for safe case closure.

The lagging practice indicator in both the baseline and second cycles continues to be "Teamwork"; the score for the countywide baseline cycle was 18% acceptable; in the thirteen offices during the second round, the cumulative "Teamwork" score modestly improved to 26% acceptable.

"Teamwork" improves the formation and function of the total support system (including the right informal as well as formal supports) around the family: to unite, communicate, and coordinate actions toward the case plan goals and following case closure.

A QSR Story

This five-year-old boy's family came to the attention of DCFS less than a year ago with allegations of Emotional Abuse by the father (inconclusive) and General Neglect by the mother (substantiated) towards him and his nine-year-old sister. A physical altercation allegedly occurred between the mother and the father that resulted in the mother sustaining an injury to her head and neck. The focus child was at home and witnessed the incident. The mother was transported to the hospital and the father, who was intoxicated at the time of the incident, was arrested. The mother accepted an Emergency Protection Order at the time of the father's arrest. The parents separated and a Voluntary Family Maintenance case was opened. The child and his sister remained at home with the mother. The father has been actively participating in his Domestic Violence program, drug and alcohol testing, and Alcoholics Anonymous. Since the opening of the case, he has tested negative for alcohol and drugs and reports that he has had seven months of sobriety. The family has no prior DCFS history.

The focus child was diagnosed with a depressive disorder following DCFS involvement. After eight sessions of individual counseling and, more recently, two sessions of conjoint therapy with his mother, he has shown significant improvement in his negative and irritable behaviors. Using role-play, hands-on activities and play therapy, the therapist has been working on improving his coping skills and helping him express his thoughts and feelings in order to better understand and adjust to his father not being in the home. By all accounts, the child currently has positive social relationships with his family, peers and adults. His mother would like him to participate in sports as a means to further de-stress.

The prognosis for this five-year-old boy was viewed as being very good and it was expected that he would improve to an even higher status level within the next six months. He is doing well both in his current environment and with respect to the services

he has received. It appears that, with continued support, he is on track to make progress educationally and emotionally.

Summary

This is the seventh tri-annual report provided to your Board tracking mental health acuity and response rates since the redesign. CSAT processes, RTS business rules and programming, and the associated Summary Data Report are modified as lessons are learned. Similarly, our practice and service delivery system continues to be refined through the QSR process. The next Tri-annual report to your Board dated December 31, 2014 will include the first third of FY 2014-2015 Summary Data Report and updated QSR results.

If you have any questions, please call us or your staff may contact Aldo Marin, DCFS Office of Board Relations, at (213) 351-5530.

(c) Rate of mental health services of routine screens	98.40%	96.77%	100.00%	97.19%

Track #1: Newly Detained

All newly detained children eligible for the Multidisciplinary Assessment Team (MAT) program will receive a comprehensive assessment (including mental health) and mental health service linkage. All newly detained children not eligible for MAT, or in a SPA with insufficient capacity, will receive a mental health screening by the CSW using the Child Welfare Mental Health Screening Tool (MHST). Based on a positive mental health screening, children will be referred for mental health services through the co-located DMH staff and/or Service Linkage Specialist (SLS).

Track #2: Newly Open Non-Detained

All newly opened non-detained children (family maintenance or voluntary family reunification) will receive a mental health screening by the CSW using the MHST and, based on a positive mental health screening, referred for mental health services through the co-located DMH staff and/or SLS.

Track #3: Existing Open Cases

All existing open cases will receive a mental health screening by the CSW using the MHST when the next case plan update is due or a behavioral indicator is present (unless the child is already receiving mental health services) and, based on a positive mental health screening, referred for mental health services through the co-located DMH staff and/or SLS.

Total Initial Screens, Referrals & Activities

All children in tracks # 1, 2 and 3 will receive an initial MHST upon case opening and, based on a positive mental health screening, will be referred for mental health services through the co-located DMH staff and/or SLS.

Footnotes

- (1) **Number of children** is defined as the total number of children receiving DCFS services within each screening track.
- (2) **Number of children currently receiving mental health services** is the number of children in an existing DCFS case who are currently receiving mental health services, defined as having received a billable mental health service activity within the previous 60 calendar days. The number of children currently receiving mental health services in track one and two is provided for information purposes only. The number of children currently receiving mental health services in track three is provided to show the number of children who are not required to be screened.
- (3) **Number of children requiring screens** is defined as a) the number of newly detained children with a case opening in the month; b) the number of newly open non-detained children with a case opening in the month; c) the number of children in an existing open case, not currently receiving mental health services, with a case plan update due or a behavioral indicator identified requiring the completion of a MHST within the month. Additionally, the number of children requiring screens may be reduced by the number of children in cases that were closed or by the number of runaway/abducted children in the 30 day period.
 - (a) **Number of children in cases that were closed within 30 days of case opening** is the number of children whose cases were closed during the timeframe that screening should occur.
 - (b) **Number of children that ran away or were abducted within 30 days of case opening** is the number of children that ran away or were abducted during the timeframe that screening should occur.
- (4) **Number of children screened** is defined as the total number of DCFS children for whom a MHST completed.
- (5) **Number of children pending screens** is defined as the number of children for whom a MHST is required and have not received a screen.
- (6) **Rate of screening** is defined as the percent of children screened out of the total number required to be screened using a MHST.
- (7) **Number of days between case opening/case plan due date and screen** is defined as the average number of calendar days between the DCFS case opening date or case plan due date and the completion of a MHST.
- (8) **Number of children with negative screens** is defined as the number of children with negative screens out of total children screened.
- (9) **Number of children with positive screens** is defined as the total number of children with positive screens out of total children screened.
 - (a) **Number of children screened acute** is defined as the total number of children with positive screens and acute mental health needs.
 - (b) **Number of children screened urgent** is defined as the total number of children with positive screens and urgent mental health needs.
 - (c) **Number of children screened routine** is defined as the total number of children with positive screens and routine mental health needs.
- (10) **Rate of children with positive screens** is defined as the percent of children with positive screens out of the total number of children screened.
 - (a) **Rate of acute screens** is defined as the percent of children screened and determined to have acute mental health needs out of the total number of children with positive screens.
 - (b) **Rate of urgent screens** is defined as the percent of children screened and determined to have urgent mental health needs out of the total number of children with positive screens.
 - (c) **Rate of routine screens** is defined as the percent of children screened and determined to have routine mental health needs out of the total number of children with positive screens.
- (11) **Number of children for whom consent for mental health services is declined** is defined as the number of children for whom consent for mental health services is declined by the parent/legal guardian, the court, and/or a youth age 12 years and older.
- (12) **Number of children with positive screens determined to be EPSDT-eligible** is defined as the number of children identified to be in need of a mental health assessment determined to be insured through the Federal Medicaid, Early Periodic Screening, Diagnosis, and Treatment (EPSDT) program.
- (13) **Number of children with positive screens determined to be privately insured** is defined as the number of children identified to be in need of a mental health assessment and who are privately insured (Kaiser, Blue Cross, etc.).
- (14) **Number of children referred for mental health services** is defined as the number of children referred for mental health services through all DMH and non-DMH funded programs including MAT, Wraparound, DMH directly operated clinics, other DMH contracted providers, as well as services offered through private insurance, DCFS funded programs or any other type of appropriate mental health provider/program. Additionally, the number of children requiring referral for mental health services may be reduced by the number of children in cases that were closed, by the number of runaway/abducted children or by the number of children for whom consent for mental health services was denied in the 60 days period.
 - (a) **Number of children in cases that were closed within 60 days of case opening** is the number of children whose cases were closed during the timeframe that referral to mental health services should occur.
 - (b) **Number of children that ran away or were abducted within 60 days of case opening** is the number of children that ran away or were abducted during the timeframe that referral to mental health services should occur.
 - (c) **Number of children for whom consent was declined within 60 days of case opening** is the number of children with positive screens for whom consent for mental health services was declined during the timeframe that referral to mental health services should occur.
- (15) **Number of days between screening and referral to mental health provider** is defined as the average number of calendar days between a positive MHST.
 - (a) **Number of days between children screening acute and referral to mental health provider** is defined as the average number of calendar days between the day children are determined to have acute mental health needs and the referral to a mental health provider.
 - (b) **Number of days between children screening urgent and referral to mental health provider** is defined as the average number of calendar days between the day children are determined to have urgent mental health needs and the referral to a mental health provider.
 - (c) **Number of days between children screening routine and referral to mental health provider** is defined as the average number of calendar days between the day children are determined to have routine mental health needs and the referral to a mental health provider.
- (16) **Total number of children referred to mental health services** is defined as the number of children with a positive MHST.
 - (a) **Total number of children with acute needs referred for mental health services** is defined as the number of children with a positive screen that are referred to mental health services.
 - (b) **Total number of children with urgent needs referred for mental health services** is defined as the number of children with a positive screen determined to have urgent mental health needs that are referred for mental health services.
 - (c) **Total number of children with routine needs referred for mental health services** is defined as the number of children with a positive screen determined to have routine mental health needs that are referred for mental health services.
- (17) **Rate of referral** is defined as the percent of children referred to a mental health provider out of the total number with a positive MHST.
 - (a) **Rate of referral of children with acute screens** is defined as the percent of all children with acute screens referred to a mental health provider.
 - (b) **Rate of referral of children with urgent screens** is defined as the percent of all children with urgent screens referred to a mental health provider.
 - (c) **Rate of referral of children with routine screens** is defined as the percent of all children with routine screens referred to a mental health provider.
- (18) **Number of children accessing services** is defined as the number of children referred by DCFS, based upon a positive mental health screening, who subsequently receive a mental health service, including such services as assessment, treatment, case management, consultation, etc. Additionally, the number of children required to receive mental health services may be reduced by the number of children in cases that were closed, by the number of runaway/abducted children or by the number of children for whom consent for mental health services was revoked in the 90 days period.
- (19) **Number of days between referral for mental health services and the provision of a mental health activity** is defined as the average number of calendar days between referral for mental health services and the provision of a mental health service activity.
 - (a) **Average number of days between referral and receipt of a mental health activity for children with acute needs** is defined as the average number of calendar days between the day children are determined to have acute mental health needs and the provision of a mental health activity.
 - (b) **Average number of days between referral and receipt of a mental health activity for children with urgent needs** is defined as the average number of calendar days between the day children are determined to have urgent mental health needs and the provision of a mental health activity.
 - (c) **Average number of days between referral and receipt of a mental health activity for children with routine needs** is defined as the average number of calendar days between the day children are determined to have routine mental health needs and the provision of a mental health activity.
- (20) **Rate of children that were screened for mental health needs and received a mental health activity within required timeframes** is defined as the percent of children who received a mental health service activity within the required timeframe out of the total number of children referred.
 - (a) **Rate of children with acute needs that received a mental health service activity on the same day as referral to mental health** is defined as the percent of children with acute mental health needs out of all children with acute mental health needs who received a mental health service on the same calendar day as the referral.
 - (b) **Rate of children with urgent needs that received a mental health service activity within 3 days of referral to mental health** is defined as the percent of children with urgent mental health needs out of all children with urgent needs who received a mental health service within 3 calendar days of referral.
 - (c) **Rate of children with routine needs that received a mental health service activity within 30 days of referral to mental health** is defined as the percent of children with routine mental health needs out of all children with routine needs who received a mental health service within 30 calendar days of referral.
- (21) **Number of children accessing services** is defined as the total number of children referred that received a mental health service activity.
 - (a) **Number of children with acute needs accessing services** is defined as the total number of children with acute needs referred that received a mental health activity.
 - (b) **Number of children with urgent needs accessing services** is defined as the total number of children with urgent needs referred that received a mental health activity.
 - (c) **Number of children with routine needs accessing services** is defined as the total number of children with routine needs referred that received a mental health activity.
- (22) **Rate of mental health services** is defined as the percent of children who receive a mental health service activity out of the total referred.
 - (a) **Rate of mental health services of acute screens** is defined as the percent of children with acute mental health needs out of the total number of children with acute needs referred who receive a mental health

service activity.

(b) *Rate of mental health services of urgent screens* is defined as the percent of children with urgent mental health needs out of the total number of children with acute needs referred who receive a mental health service activity.

(c) *Rate of mental health services of routine screens* is defined as the percent of children with routine mental health needs out of the total number of children with acute needs referred who receive a mental health service activity.
