APRIL 28, 2009 AMENDMENT TO ITEM NO. 24: KATIE A. STRATEGIC PLAN, MONTHLY REPORT ON THE MENTAL HEALTH SCREENING PROCESS

On April 28, 2009, the Board ordered the Chief Executive Officer (CEO), the Department of Children and Family Services (DCFS) and the Department of Mental Health (DMH) to prepare a monthly report on the mental health screening process. On January 19, 2010, the Board ordered the CEO, DCFS and DMH to report on how to reduce the time between mental health screening and the start of mental health services. In response, DCFS and DMH reviewed a sample of children's cases and on March 16, 2010 provided the Board with a plan that resulted in a redesign of the Coordinated Services Action Team (CSAT) and Referral Tracking System (RTS). On April 17, 2012, the Board Deputies approved the current format of the report and agreed that the report, dated April 30, 2012, would be the last monthly report and, going forward, the report will be submitted every 4 months on August 31, 2012, December 31, 2012 and April 30, 2013.

This is the first tri-annual report updating your Board on the redesign of the CSAT implemented on October 1, 2010 in Service Planning Area (SPA) 7 and from November 1, 2010 through June 30, 2012 in SPAs 1, 2, 3, 4, 5, 6 and 8.

CSAT Process

The CSAT process (Attachment 1) requires expedited screening and response times based upon the acuity of a child's need for mental health services. Additionally, the CSAT process provides for the annual screening of children in existing cases with previous negative screens. Four tracks establish the process by which all DCFS children in new and currently open cases are screened and referred for mental health services.

Track	Screening Process
Track 1	Children in newly opened cases who are detained and placed in out-of-home care receive a mental health screening at case opening.
Track 2	Children in newly opened cases under Voluntary Family Maintenance, Voluntary Family Reunification or Court-supervised Family Maintenance case plans are screened at case opening.
Track 3	Children in existing cases opened before CSAT implementation are screened at the next case plan update.
Annual	Children in existing cases are screened 12 months after previously screening negative.

Referral Tracking System (RTS)

The RTS Summary Data Report (Attachment 2) includes 22 data elements providing the rate, number, timeliness, and acuity of mental health screenings, referral, and service response times to DCFS children in new and existing cases on a point-in-time basis.

The RTS Summary Data Report as of August 16, 2012 provides the progress of all SPAs from CSAT redesign implementation through June 30, 2012. This report reflects CSAT performance completed through August 16, 2012 and is a snapshot of work in progress. The following two charts depict the results to date for all three tracks associated with the screening and referral process:

Chart I shows that of 43,185 children, 36,988 children required screens. (43,185 minus those currently receiving mental health services [5,199[1]], in closed cases [1,644], who ran away or were abducted [209]):

- **25,922 (70.08%) children screened positive of all children requiring screens (36,988);**
- **10,508 (28.41%) children screened negative of all children requiring screens (36,988);**
- **558 (1.51%) children have screens pending of all children requiring screens (36,988).**

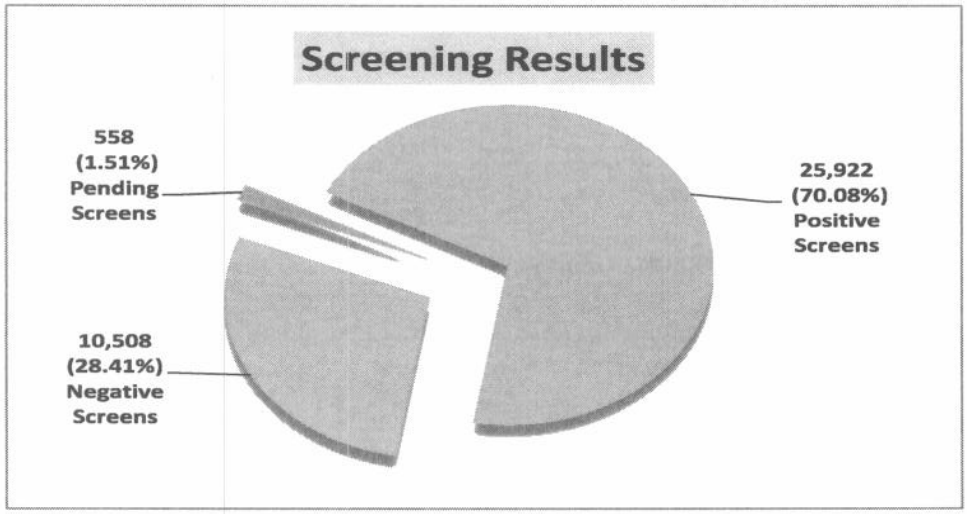

Chart II shows that of the 25,922 children who screened positive:

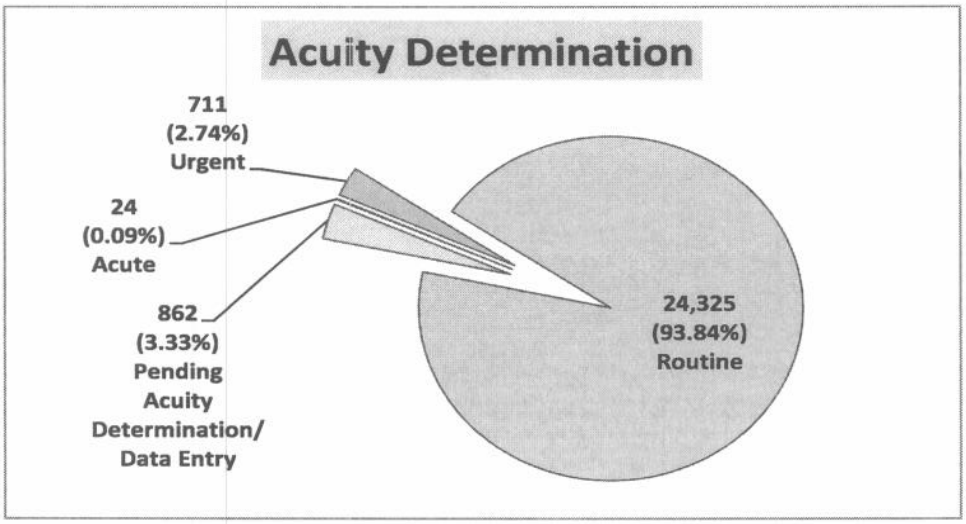
- **24 (0.09%) children were determined to have acute needs;**
- **711 (2.74%) children were determined to have urgent needs;**
- **24,325 (93.84%) children were determined to have routine needs;**
- **862 (3.33%) children's acuity level was pending determination and/or data entry.**



[1] The total number of children in all tracks currently receiving mental health services is 5,199. However, only children in existing cases (track 3 [4,492]) are subtracted from the total number of children requiring screens because all children in new cases (track 1 [94] and track 2 [613]) must be screened whether or not they are already receiving mental health services.

Acuity Referral Standards

Acute	Children presenting with acute needs are referred for mental health services on the same day as screening.
Urgent	Children presenting with urgent needs are referred for mental health services within one day of screening.
Routine	Children presenting with routine needs are referred for mental health services within 10 days of screening.

The average number of days between screening and referral to DMH for mental health services according to acuity:

- Children with acute needs were referred to DMH on the same day on average.
- Children with urgent needs were referred to DMH on the same day on average.
- Children with routine needs were referred to DMH 4 days on average.

Mental Health Service Activity Standards

Acute	Children presenting with acute needs begin receiving mental health service activities on the same day as the referral.
Urgent	Children presenting with urgent needs begin receiving mental health service activities within no more than three days of the referral.
Routine	Children presenting with routine needs begin receiving mental health service activities within no more than thirty days of the referral.

During the period of October 2010 through June 2012:

- The average number of days for receipt of a mental health service activity was on the same day for children with acute needs;
- The average number of days for receipt of a mental health service activity was 1 day for children with urgent needs; and
- The average number of days for receipt of a mental health service activity was 2 days for children with routine needs.

During the period of October 2010 through June 2012:

- 95.83 percent of children with acute needs received DMH services on the same day they were referred;
- 88.05 percent of children with urgent needs received DMH services within 3 days of the referral; and

- 95.96 percent of children with routine needs received DMH services within no more than 30 days of the referral.

Achievements

As of August 16, 2012, the average timeline from case opening/case plan update to the start of mental health service activities is 14 days.

DCFS and DMH continue to see improvements in mental health screening, assessment and service delivery:

- 98.49 percent of children screened for mental health needs;
- 98.59 percent of children referred to mental health services; and
- 97.36 percent of children initiated mental health service activities.

Quality Service Review

The Quality Service Review (QSR) process is the central strategy adopted by the County, in collaboration with the Katie A. Advisory Panel and plaintiff attorneys, to assess the quality of the services delivered to children in DCFS cases. The QSR is an action-oriented learning process used to improve practice, service delivery and outcomes for children and families. The QSR is also a measure of how well DCFS and DMH are implementing the Core Practice Model, the primary framework for practice expectations. Findings from case reviews guide next steps to support and improve practice, service delivery and outcomes for the children served.

The QSR measures both systems' practice, service delivery and outcomes for children and families. It reflects the quality of services in such areas as child, youth and family engagement, teaming, assessment of needs, and the provision of timely and adequate services and supports. The QSR evaluates outcomes such as safety, permanency, well-being, school performance, and the ability to form appropriate social relationships.

The following provides a sample of historical and the most recent QSR results, a narrative and QSR case story. The focus is on those indicators that are most essential to improving the practice, service delivery and outcomes. As a point of reference, the higher the scores achieved, the better the service delivery, practice and outcomes. Benchmarks targeted for systems performance and child status are noted in the table below. Definitions of these indicators are found at the end of this section.

QSR Results

	Regional office	Date of Last QSR Month /Year	Overall Child/ Youth Status*	Overall Practice Performance*	Engagement**	Teaming**	Assessment Child**	Long-term View	Intervention Services and Supports	Adequacy of Services and Supports

**A score of 75 is our target score and Katie A. exit criteria

Definition of Indicators

INDICATOR	DEFINITION
Overall Child/Youth Status	The QSR Protocol provides ten qualitative indicators for measuring the current status of a focus child.
Overall Practice Performance	This measure is based on nine qualitative indicators measuring certain core practice functions being provided with and for the focus child and the child's parents and/or caregivers.
Engagement	Degree to which those working with the focus child and family are: Relating with the child/youth, biological family, extended family, primary caregiver, and other team members for building a genuine, trusting and collaborative working relationship. Identifying a support system and/or finding family members who can assist with support and permanency for the focus child. Developing and maintaining a mutually beneficial trust-base working relationship with the child and family that involve having unconditional positive regard, respect for diversity, an inclusive planning process, and the ability to understand and work through resistance to participating in services. Focusing on the child and family's strengths and needs. Being receptive, dynamic, and willing to make adjustments in scheduling and meeting locations to accommodate family participation. Offering transportation are supports, where necessary, to increase family participation in planning and support efforts.
Teaming	Degree to which: (1) the "right people" for this child and family have formed a working Child and Family Team that meets, talks, and plans together. (2) The CFT has the skills, family knowledge, and abilities necessary to define the strengths and needs of this child and family and to organize effective service for this child and family, given the level of complexity of circumstances and cultural background of the child and family. (3) Members of the child and family's team collectively function as a unified team in planning services and evaluating results. (4) The decisions and actions of the team reflect a coherent pattern of effective teamwork and collaborative problem solving that builds upon child and family strengths and needs to benefit the child and family.
Assessment	Degree to which those involved with the child and family understand: (1) Their strengths, needs, preferences, and underlying issues. (2) What must change for the child to function effectively in daily settings and activities and for the family to support and protect the child effectively? (3) What must change for the child/family to have better overall well-being and improve family functioning? (4) The "big picture" situation and dynamic factors affecting the child and family sufficiently to guide intervention. (5) The outcomes desired by the child and family from their involvement with the system. (6) The path and pace by which permanency will be achieved for a child who is not living with nor returning to the family of origin.
Long-term View	Degree to which: There are stated, shared, and understood safety, well-being, and permanency outcomes and functional life goals for the child and family that specify required protective capacities, desired behavior changes, sustainable supports, and other accomplishments necessary for the child and family to achieve and sustain adequate daily functioning and greater self-sufficiency
Intervention Services and Supports	Degree to which the strategies, supports, and services planned for the child, parent or caregiver, and family are available on a timely and adequate basis to meet near-term child and family needs and to achieve the outcomes planned.
Adequacy of Services and Supports	Degree to which planned interventions, services, and supports being provided to the child and family have *sufficient power* (precision, intensity, duration, fidelity, and consistency) and *beneficial effect* to produce results necessary to meet near-term needs and achieve outcomes that fulfill the long-term view.

Most Recent QSR Results

The most recent QSR was conducted in the Torrance regional office in SPA 8. The key results of this QSR are provided below:

SPA	Regional office	Date of Last QSR Month /Year	Overall Child/ Youth Status*	Overall Practice Performance*	Engagement**	Teaming**	Assessment Child**	Long-term View	Intervention Services and Supports	Adequacy of Services and Supports
8	Torrance	June 2012	100%	80%	90%	30%	70%	40%	100%	70%

Of the ten randomly selected cases reviewed in Torrance, 100 percent scored in the acceptable range with respect to overall child/youth status and 100 percent received favorable safety scores ("safety from exposure to threats of harm" and "safety from risk to self/others").

Of the cases reviewed in the Torrance office, 80 percent scored in the acceptable range with respect to overall practice. This score was 35 percent higher than the countywide average baseline score for overall practice of 45 percent. In fact, the Torrance office scored higher on every practice indicator when compared to the countywide average baseline score. Two practice indicators were notably higher; 90 percent of the cases reviewed scored favorably on "engagement" (compared to 58 percent in the countywide baseline) and 100 percent of their cases scored in the favorable range on "supports and services" (compared to 64 percent in the countywide baseline). The Torrance office had 70 percent of sample cases score in the acceptable range on the practice indicator of "intervention adequacy."

The sample cases showed that those working with the focus child and family built trust-based working relationships through a strength-based perspective, respect for diversity, inclusive planning, family finding and the identification of their natural support systems. In addition, efforts were made to accommodate and increase the family's participation with flexible scheduling, meeting locations, transportation help and childcare by the effective use of Parent Partners. The cases also revealed that focus children and families received timely and adequate access to a full array of court ordered or case practice driven services and supports to meet child and family needs to achieve planned outcomes.

As expected, the lagging practice indicators in the Torrance office are the same as those in the countywide baseline. On "teamwork," 30 percent of the cases reviewed in the Torrance office scored in the favorable range, which is better than the countywide baseline score of 16 percent. On "assessment," 70 percent of the cases reviewed scored in the favorable range and 44 percent favorable scores for "long-term view."

An improved "long term view" provides a clearly articulated vision that guides everyone toward safe case closure, cases without a "long term view" result in court driven practice versus quality, casework driven practice. The Torrance sample cases generally revealed a marginally inadequate specification of safety, well-being, and permanency outcomes and functional life goals for the child and family that required

protective capacities, desired behavior changes, sustainable supports, and other accomplishments for the intervention process to conclude successfully.

The cases showed that the typical child and family team included few important supporters and decision makers in the child and family's life. The child and family met and planned together occasionally, members functioned as a splintered group in planning services and evaluating results and marginal coordination of services were seen across agencies for the child and family. Further, many team meetings were held through Team-Decision Making and Wraparound but the on-going team was not integrated or maintained between meetings.

A better assessment and strengths-based identification of needs increases understanding of underlying needs required for true and lasting change. In the sample of cases reviewed in Torrance, children and parents' functioning and support systems were not well understood. Information necessary to understand children and family strengths, needs, and choices was limited and only occasionally updated. Strengths, risks, and trauma-related, underlying needs requiring intervention or supports were partially understood. Necessary changes in behavior or conditions were recognized, but not used to support the current strategies.

Office-based Implementation Teams, training, coaching, and the utilization of the QSR process are the primary strategies employed by the Departments to improve practice and outcomes. Additionally, as a designated office of the California Partners for Permanency (CAPP) federal grant, the Torrance office administration will receive federal and state technical assistance on implementation of these strategies. The Torrance office has formed their Implementation Team. Seventy percent of Children's Social Workers (CSW) and ninety-five percent of Supervising Children's Social Workers (SCSW) have completed the Enhanced Skill Based training. Core Practice Model training was provided to DMH agency providers in the catchment area. Monthly coaching support groups are available to all Torrance SCSWs. In addition, two Continuing Service units and partnering agency staff receive in-depth coaching. Finally, Torrance administration completes a QSR next-step action plan. A QSR is conducted in each regional office and associated mental health provider system approximately every eighteen months. Through the activities described and by the next QSR, scores are expected to increase for children and families served in Torrance.

A QSR Story

Eight-month-old WP's involvement with DCFS began in September 2012 following allegations of general neglect. He and his mother tested positive for methamphetamines. He was placed in a foster home for six months. At the time of the QSR, he was residing with his paternal grandparents.

WP received an initial examination at a Medical Hub, was evaluated by the Regional Center and determined to be eligible for Early Start services. He also received a Multidisciplinary Assessment Team (MAT) assessment. His mother participated in the Family Reunification Drug Dependency Court Program. Initially seen in an outpatient program, she was determined to need inpatient treatment after several relapses. She is awaiting linkage to a mental health therapist.

The DCFS worker engages the family and continues to encourage WP's mother. She feels supported by her attorney who listens to her concerns and advocates on her behalf. The team meets often, communicates, tracks and adjusted mother's treatment when she relapsed. She is committed to her recovery and is described as a leader. At the time of the review, WP had an appointment at the Failure to Thrive clinic in order to monitor his weight. All those interviewed felt that WP appeared developmentally on target and bonded to his mother and paternal grandparents.

Summary

This is the first tri-annual report provided to your Board tracking mental health acuity and response rates since the redesign. CSAT processes, RTS business rules and programming, and the associated Summary Data Report are modified as lessons are learned. Modification of the Summary Data Report is currently underway to breakout performance on an annual basis, rather than cumulatively since implementation, to provide a more accurate picture of current practice and performance. Similarly, our practice and service delivery system is being refined through the QSR process. The next tri-annual report due to your Board on December 31, 2012, will include the Fiscal Year 2011-2012 Summary Data Report and updated QSR results.

If you have any questions, please call us or your staff may contact Aldo Marin, DCFS Office of Board Relations, at (213) 351-5530.

BOS RTS Summary Data Report

		Newly Detained Track 1	Newly Opened Non Detained Track 2	Existing Open Cases Track 3	Total Initial Screens, Referrals & Activities
West San Fernando Valley	*(b) Rate of mental health services of urgent screens*	100.00%	100.00%	100.00%	100.00%
	(c) Rate of mental health services of routine screens	99.20%	97.67%	96.49%	97.89%

Track #1: Newly Detained

All newly detained children eligible for the Multidisciplinary Assessment Team (MAT) program will receive a comprehensive assessment (including mental health) and mental health service linkage. All newly detained children not eligible for MAT, or in a SPA with insufficient capacity, will receive a mental health screening by the CSW using the Child Welfare Mental Health Screening Tool (MHST). Based on a positive mental health screening, children will be referred for mental health services through the co-located DMH staff and/or Service Linkage Specialist (SLS).

Track #2: Newly Open Non-Detained

All newly opened non-detained children (family maintenance or voluntary family reunification) will receive a mental health screening by the CSW using the MHST and, based on a positive mental health screening, referred for mental health services through the co-located DMH staff and/or SLS.

Track #3: Existing Open Cases

All existing open cases will receive a mental health screening by the CSW using the MHST when the next case plan update is due or a behavioral indicator is present (unless the child is already receiving mental health services) and, based on a positive mental health screening, referred for mental health services through the co-located DMH staff and/or SLS.

Total Initial Screens, Referrals & Activities

All children in tracks # 1, 2 and 3 will receive an initial MHST upon case opening and, based on a positive mental health screening, will be referred for mental health services through the co-located DMH staff and/or SLS.

Footnotes

(1) Number of children is defined as the total number of children receiving DCFS services within each screening track.

(2) Number of children currently receiving mental health services is the number of children in an existing DCFS case who are currently receiving mental health services, defined as having received a billable mental health service activity within the previous 60 calendar days. The number of children currently receiving mental health services in track one and two is provided for information purposes only. The number of children currently receiving mental health services in track three is provided to show the number of children who are not required to be screened.

(3) Number of children requiring screens is defined as a) the number of newly detained children with a case opening in the month; b) the number of newly open non-detained children with a case opening in the month; c) the number of children in an existing open case, not currently receiving mental health services, with a case plan update due or a behavioral indicator identified requiring the completion of a MHST within the month. Additionally, the number of children requiring screens may be reduced by the number of children in cases that were closed or by the number of runaway/abducted children in the 30 days period.

(a) Number of children in cases that were closed within 30 days of case opening is the number of children whose cases were closed during the timeframe that screening should occur.

(b) Number of children that ran away or were abducted within 30 days of case opening is the number of children that ran away or were abducted during the timeframe that screening should occur.

(4) Number of children screened is defined as the total number of DCFS children for whom a MHST completed.

(5) Number of children pending screens is defined as the number of children for whom a MHST is required and have not received a screen.

(6) Rate of screening is defined as the percent of children screened out of the total number required to be screened using a MHST.

(7) Number of days between case opening/case plan due date and screen is defined as the average number of calendar days between the DCFS case opening date or case plan due date and the completion of a MHST.

(8) Number of children with negative screens is defined as the number of children with negative screens out of total children screened.

(9) Number of children with positive screens is defined as the total number of children with positive screens out of total children screened.

(a) Number of children screened acute is defined as the total number of children with positive screens and acute mental health needs.

(b) Number of children screened urgent is defined as the total number of children with positive screens and urgent mental health needs.

(c) Number of children screened routine is defined as the total number of children with positive screens and routine mental health needs.

(10) Rate of children with positive screens is defined as the percent of children with positive screens out of the total number of children screened.

(a) Rate of acute screens is defined as the percent of children screened and determined to have acute mental health needs out of the total number of children with positive screens.

(b) Rate of urgent screens is defined as the percent of children screened and determined to have urgent mental health needs out of the total number of children with positive screens.

(c) Rate of routine screens is defined as the percent of children screened and determined to have routine mental health needs out of the total number of children with positive screens.

(11) Number of children for whom consent for mental health services is declined is declined is defined as the number of children for whom consent for mental health services is declined by the parent/legal guardian, the court, and/or a youth age 12 years and older.

(12) Number of children with positive screens determined to be EPSDT-eligible is defined as the number of children identified to be in need of a mental health assessment determined to be insured through the Federal Medicaid, Early Periodic Screening, Diagnosis, and Treatment (EPSDT) program.

(13) Number of children with positive screens determined to be privately insured is defined as the number of children identified to be in need of a mental health assessment and who are privately insured (Kaiser, Blue Cross, etc.).

(14) Number of children referred for mental health services is defined as the number of children referred for mental health services through all DMH and non-DMH funded programs including MAT, Wraparound, DMH directly operated clinics, other DMH contracted providers, as well as services offered through private insurance, DCFS funded programs or any other type of appropriate mental health provider/program. Additionally, the number of children requiring referral for mental health services may be reduced by the number of children in cases that were closed, by the number of runaway/abducted children or by the number of children for whom consent for mental health services was denied in the 60 days period.

(a) Number of children in cases that were closed within 60 days of case opening is the number of children whose cases were closed during the timeframe that referral to mental health services should occur.

(b) Number of children that ran away or were abducted within 60 days of case opening is the number of children that ran away or were abducted during the timeframe that referral to mental health services should occur.

(c) Number of children for whom consent was declined within 60 days of case opening is the number of children with positive screens for whom consent for mental health services was declined during the timeframe that referral to mental health services should occur.

(15) Number of days between screening and referral to mental health provider is defined as the average number of calendar days between a positive MHST.

(a) Number of days between children screening acute and referral to mental health provider is defined as the average number of calendar days between the day children are determined to have acute mental health needs and the referral to a mental health provider.

(b) Number of days between children screening urgent and referral to mental health provider is defined as the average number of calendar days between the day children are determined to have urgent mental health needs and the referral to a mental health provider.

(c) Number of days between children screening routine and referral to mental health provider is defined as the average number of calendar days between the day children are determined to have routine mental health needs and the referral to a mental health provider.

(16) Total number of children referred to mental health services is defined as the number of children with a positive MHST.

(a) Total number of children with acute needs referred for mental health services is defined as the number of children with a positive screen that are referred for mental helath services.

(b) Total number of children with urgent needs referred for mental health services is defined as the number of children with a positive screen determined to have urgent mental health needs that are referred for mental health services.

(c) Total number of children with routine needs referred for mental health services is defined as the number of children with a positive screen determined to have routine mental health needs that are referred for mental health services.

(17) Rate of referral is defined as the percent of children referred to a mental health provider out of the total number with a positive MHST.

(a) Rate of referral of children with acute screens is defined as the percent of children screened and determined to have acute mental health needs out of the total number of children screened.

(b) Rate of referral of children with urgent screens is defined as the percent of all children with urgent screens referred to a mental health provider.

(c) Rate of referral of children with routine screens is defined as the percent of all children with routine screens referred to a mental health provider.

(18) Number of children accessing services is defined as the number of children referred by DCFS, based upon a positive mental health screening, who subsequently receive a mental health service, including such services as assessment, treatment, case management, consultation, etc. Additionally, the number of children required to receive mental health services may be reduced by the number of children in cases that were closed, by the number of runaway/abducted children or by the number of children for whom consent for mental health services was revoked in the 90 day period.

(19) Number of days between referral for mental health services and the provision of a mental health activity is defined as the average number of calendar days between referral for mental health services and the provision of a mental health service activity.

(a) Average number of days between referral and receipt of a mental health activity for children with acute needs is defined as the average number of calendar days between the day children are determined to have acute mental health needs and the provision of a mental health activity.

(b) Average number of days between referral and receipt of a mental health activity for children with urgent needs is defined as the average number of calendar days between the day children are determined to have urgent mental health needs and the provision of a mental health activity.

(c) Average number of days between referral and receipt of a mental health activity for children with routine needs is defined as the average number of calendar days between the day children are determined to have routine mental health needs and the provision of a mental health activity.

(20) Rate of children that were screened for mental health needs and received a mental health activity within required timeframes is defined as the percent of children who received a mental health service activity within the required timeframe out of the total number of children referred.

(a) Rate of children with acute needs that received a mental health service activity on the same day as referral to mental health is defined as the percent of children with acute mental health needs out of all children with acute mental health needs who received a mental health service on the same calendar day as the referral.

(b) Rate of children with urgent needs that received a mental health service activity within 3 days of referral to mental health is defined as the percent of children with urgent mental health needs out of all children with urgent needs who received a mental health service within 3 calendar days of referral.

(c) Rate of children with routine needs that received a mental health service activity within 30 days of referral to mental health is defined as the percent of children with routine mental health needs out of all children with routine needs who received a mental health service within 30 calendar days of referral.

(21) Number of children accessing services is defined as the total number of children referred that received a mental health service activity.

(a) Number of children with acute needs accessing services is defined as the total number of children with acute needs referred that received a mental health activity.

(b) Number of children with urgent needs accessing services is defined as the total number of children with urgent needs referred that received a mental health activity.

(c) Number of children with routine needs accessing services is defined as the total number of children with routine needs referred that received a mental health activity.

(22) Rate of mental health services is defined as the percent of children who receive a mental health service activity out of the total referred.

(a) Rate of mental health services of acute screens is defined as the percent of children with acute mental health needs out of the total number of children with acute needs referred who receive a mental health service activity.

(b) Rate of mental health services of urgent screens is defined as the percent of children with urgent mental health needs out of the total number of children with urgent needs referred who receive a mental health service activity.

(c) Rate of mental health services of routine screens is defined as the percent of children with routine mental health needs out of all children with routine needs referred who receive a mental health service activity.
